Press Release

Employment Record Service LLC announced today that they have changed their employment screening and verifications services web domain (ERS Hire) to Pinpoint America™.

“Our company felt that after 10 years, its old name no longer reflected the growth of our service offerings, technical maturity or the scale of our global businesses,” said Jon Socolof, President of Employment Record Service LLC. “This new identity better reflects our mission – to continue to provide access to critical risk management and hiring information for our public, private and government partners.”

As the leading provider of employee background checks, tenant checks and other verification reports to employers, healthcare providers, property managers and government agencies, Pinpoint America™ will continue to provide online, critical risk management information including access to nationwide criminal records, sex offenders, eviction records, driving records, credit reports, social security and identity verification, employment and education verification, Patriot Act and foreigner verification and other custom screening products.

Pinpoint America™ is a registered trademark of Employment Record Service LLC, the leading outsource provider of employee record management services including a full range of applicant screening and credentialing, I-9 form compliance, Patriot Act, payroll [employment and income verification](#) (VerifyX™) and unemployment cost management services (UCCI™).
